

HARSH KUMAR

Software Developer | Full-Stack Engineer | AI Systems

+91 7055034867 | harsh237hk@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Software Developer with hands-on experience designing, building, and deploying scalable full-stack web applications and AI-powered systems using JavaScript, TypeScript, React, Node.js, and Express.js. Skilled in RESTful API design, relational and NoSQL databases, and the end-to-end software development lifecycle (SDLC) from architecture through production deployment. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, and System Design, with proven ability to deliver production-grade software in Agile, cross-functional team environments. Active open-source contributor focused on clean code, performance optimization, and applied AI engineering.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript (ES6+), TypeScript, C, Go
- **Frontend Development:** React.js, Next.js, Tailwind CSS, Bootstrap, HTML5, CSS3, Zustand, TanStack Query
- **Backend Development:** Node.js, Express.js, RESTful APIs, Microservices & MVC Architecture, OAuth
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis, Vector Databases (Qdrant)
- **AI & Machine Learning:** LangGraph, LangChain, RAG, Agentic AI, Semantic Search, Embeddings, Prompt Engineering
- **Cloud, DevOps & Tools:** Git, GitHub, Docker, AWS, Azure, Vercel, CI/CD, BullMQ, Postman
- **Core CS Concepts:** Data Structures & Algorithms, OOP, System Design, SDLC, Agile/Scrum, Problem Solving

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern

Aug 2025 – May 2026

Apptroid Technologies Pvt. Ltd. | India

- Designed and developed scalable, production-grade software modules using Next.js, Express.js, TypeScript, and MySQL, contributing across the full software development lifecycle (SDLC) from design through deployment.
- Built and maintained RESTful APIs powering core business workflows, improving backend reliability and reducing query response times through optimized data access patterns.
- Collaborated with cross-functional engineering and product teams in an Agile environment, participating in sprint planning, code reviews, and version-controlled (Git) development workflows.
- Improved CI/CD and deployment workflows, streamlining release cycles and reducing manual deployment effort while maintaining system performance and reliability.

Web Developer

Oct 2024 – Present

Google Developer Groups (GDG), AKGEC | India

- Developed and maintained responsive, accessible web applications using React, Node.js, and Tailwind CSS, applying industry-standard coding practices and Git-based version control.
- Collaborated with a distributed team of student developers to plan, build, and ship web projects, strengthening skills in collaborative software development, code review, and Agile delivery.
- Improved application performance, accessibility, and cross-browser compatibility across multiple production web projects and deployment workflows.

PROJECTS

Eval — AI Video Intelligence Platform

[GitHub](#) | [Live](#)

- Architected and built a production-grade AI-powered video intelligence platform that compares YouTube videos and Instagram Reels using Retrieval-Augmented Generation (RAG), Agentic AI, and semantic search.
- Designed an automated transcript ingestion pipeline (YouTube Transcript API, yt-dlp, Whisper API, FFmpeg, OpenAI Embeddings, Qdrant) for metadata-aware retrieval and conversational AI analysis.
- Engineered scalable backend workflows with LangGraph, LangChain, Redis, BullMQ, and Server-Sent Events (SSE) streaming, enabling real-time inference, contextual memory, and asynchronous processing.
- Delivered source-cited, context-aware responses to improve output transparency and reliability for end users.

Git-SAT — Git Standup Automation CLI

[GitHub](#) | [Live](#)

- Built a production-grade CLI tool (Node.js) that parses Git commits and diffs to auto-generate developer standup summaries in text, Markdown, and JSON formats.
- Implemented secure OAuth Device Code Flow authentication and designed an extensible CLI architecture with diagnostics commands and modular API integrations.
- Reduced documentation overhead by 55%+ and cut time spent writing commit summaries by approximately 80%, demonstrating measurable developer-productivity impact.

EDUCATION

B.Tech in Computer Science — AKGEC, AKTU | CGPA: 7.9/10

2023 – 2027

ACHIEVEMENTS & INTERESTS

- Two-time Inter-School Debate Winner • 93+ percentile in JEE Mains • Active open-source contributor • **Interests:** Artificial Intelligence, Software Architecture, Open Source, System Design, Problem Solving
